1. Applicant's election with traverse of Group I in the reply filed on 11/05 is acknowledged. The traversal is on the ground(s) that the restriction is improper and unduly burdensome. This is not found persuasive because the invention are distinct and the search required for one is not required for the other and it is the examiner's position that it would be burdensome.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 7-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 11/05.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Herbst-Dederichs (DE 10061749) or Anand et al (4,925,626).

Herbst-Dederichs or Anand et al disclose the claimed coating having the claimed proportion of cobalt and chromium, with the claimed tungsten carbide grain size.

Art Unit: 1775

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Herbst-Dederichs (DE 10061749) or Anand et al (4,925,626).

Herbst-Dederichs or Anand et al disclose the invention substantially as claimed except for the claimed thickness.

It would have been obvious to one of ordinary skill in the art to provide a coating within the claimed thickness, as one of ordinary skill would know that the thickness would depend on the particular use of the wear coating disclosed.
